EDUARDO BLANCO RIVAS

FULL STACK DEVELOPER // HTLM5 // Javascript // CSS3 // Node.js // React // DOM // Vite // Git

DETAILS

MADRID, España
eduardoblanco1987@gmail.com
602488895

PROFILE

I am a Full Stack developer, I trained in the area of law and gastronomic management but since 2020 I decided to embark on a change of life towards programming, going through basic knowledge of IT and basic Python, but fully entering the area of WEB DEVELOPER.

I am a faithful believer that teamwork is a fundamental pillar of any company to achieve maximum efficiency, which is why my coworkers consider me a worker who is involved not only with the company but also with the staff.

It makes good use of JavaScript methods and logic such as manipulating the HTML Dom, as well as making use of libraries such as Tailwind and Bootstarp to create unique applications using CSS. Also, I have the ability to work with control systems mainly Git.

Although I have finished my training relatively recently, I feel empowered to be able to apply what I have learned in your company and also to be able to learn from everything that is always needed in this world of development and is always changing.

My goal is to apply everything obtained so far to achieve the best possible results in your company. Currently I have just finished studying full stack development giving me the initial knowledge to undertake in a new area.
